DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-49 and 71-91 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Williams et al. (reference "E" in the IDS).

Williams et al. (see fige, 1-4) disclose a magnetic levitation stage apparatus, comprising: a platen having an upper surface capable of supporting a workpiece; a set of magnet arrays arranged on a bottom surface of the platen; first and second side magnet arrays arranged on respective opposite first and second sides of the platen; a supporting frame at least partially surrounding the platen on the first and second sides and the bottom surface; a plurality of motor coils arranged on the supporting frame so as to be in operable communication with the set of magnet arrays and the first and second side magnet arrays; and wherein the set of magnet arrays and first and second side magnet arrays and the plurality of motor coils are operable to magnetically levitate the platen within the support frame and move the platen in up to six degrees of freedom (see abstract).
